

# Extracting Usage Data

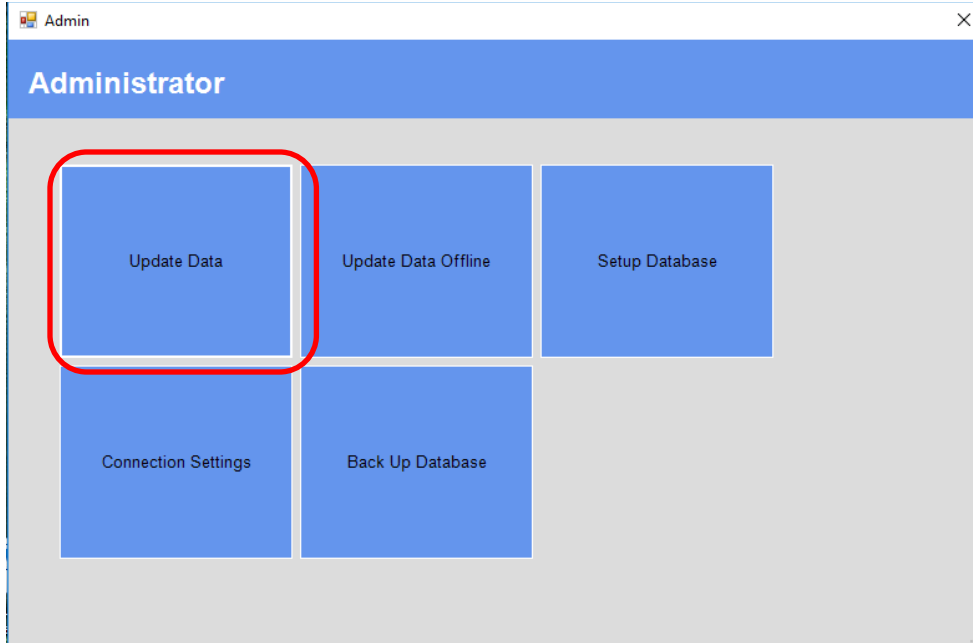

## How to Update Data to Online Server

Step 1: Click on USky Smart classroom icon. You will get User Login window. Then follow the below steps.

The screenshot shows a 'User Login' window with a blue header. The header contains the text 'User Login' and 'UDISE CODE 2547898562'. The main content area is divided into two sections. The left section is titled 'New Users' and contains two buttons: 'New Student' and 'New Teacher'. Below these buttons is the text 'Open Connection Settings' and a blue link 'Settings'. The right section contains two radio buttons: 'Student' (unselected) and 'Teacher' (selected). Below the radio buttons are two text input fields: 'User Name' containing 'superadmin' and 'Password' containing a series of dots. Below the input fields are two buttons: 'Login' and 'Cancel'.

1. Select **Teacher** radio button.
2. Enter User Name as : **superadmin**
3. Enter Password as : **superadmin**
4. Click **Login** button

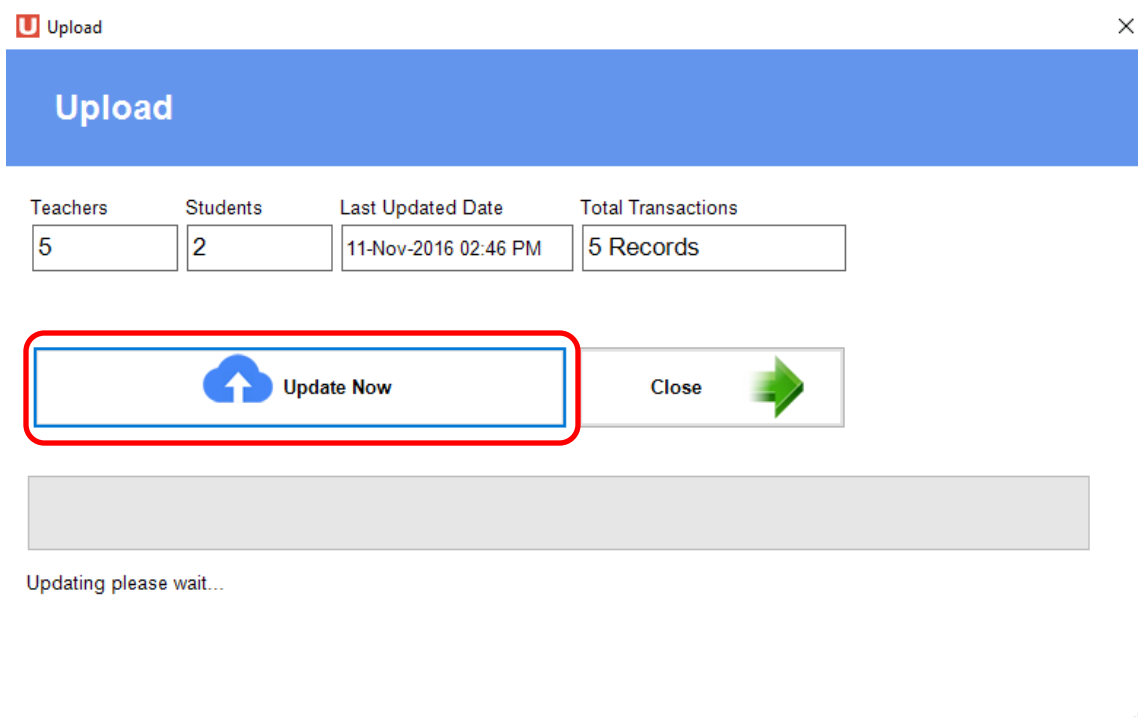

You will get the following **Administrator** window

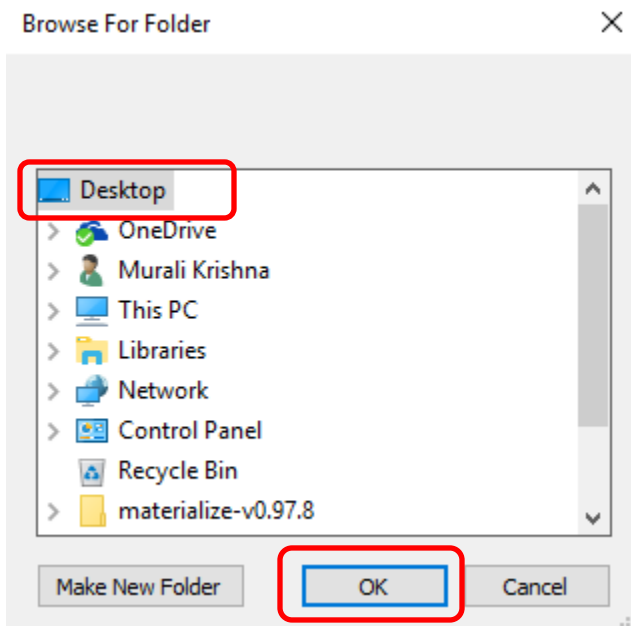

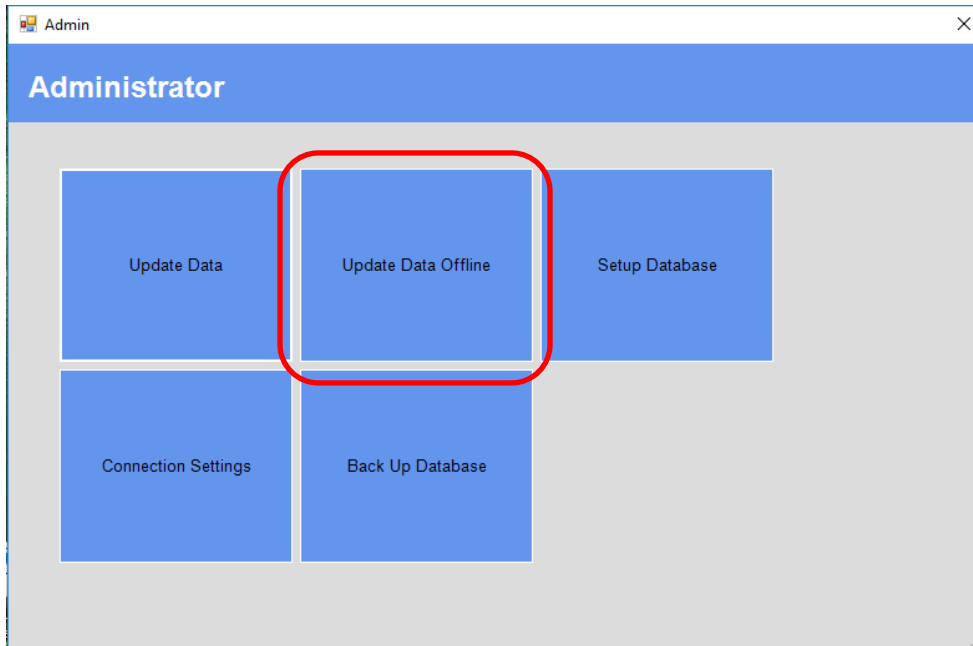

In Administrator window there are 4 buttons available.

1. Update Data
2. Update Data Offline
3. Setup Database
4. Connection Settings
5. Back Up Database

**Update Data:** Click on Update Data button. Now you will get the following screen.

Click on **Update Now** button. It will update all offline data to the online server. It requires the Internet connection to Update. If you don't have the Internet connection, click on the **Update Data Offline** button from the Administrator window.

Select the folder where you want to save the offline generated data file and click OK button. This file is in xml format. Select that xml file and mail it to [support@usky.in](mailto:support@usky.in) mail.
